Recent Professional Experience

Studio Visual – Software Engineer (Fullstack)

<https://studiovisual.com.br>

Apr 2022 - Present

- I develop high-performance websites and software. In my routine, I work with several different technologies, such as (React.js, Vue.js, JavaScript, PHP, WordPress, SageRoots, Tailwind, and AWS).
- Introduced CI/CD pipelines, automating more than 90% of the deployment work (GitHub Actions, NewRelic)
- I also work on my soft-skills, dealing with clients, managing their cards via trello and jira.
- According to the data gathered, the implementation of improvements in the quality of service, aiming for excellence in customer service and achieving customer satisfaction, yielded a rate exceeding 80
- We have weekly meetings to align with the client. Using kanban as project management.

Professional Freelancer – Software Engineer (Fullstack)

<https://studiovisual.com.br>

Jul 2020 - Present

- I work with WordPress, focusing on quality development in both backend and frontend to deliver the best solutions to clients. (PHP, WordPress, Javascript, React.js, Tailwind)
- We work with online stores, using WooCommerce and its various payment and shipping methods. (Woocommerce, PagSeguro, PayPal, FedEx, Melhor Envio, Frenet(Brazilian methods)).

Evoluma Sistemas – Software Engineer (Fullstack)

<https://evoluma.com.br/evoluma/>

Mar 2021 - Jan 2022

- I worked on a project that integrated a web system with an embedded system for water and sewage treatment. (Java, JSF, React.js, PHP, Symphone, C/C++)
- I was responsible for an improvement in the software where the system previously recognized only 8-bit commands, upgrading it to 16 bits. This enhancement improved the responsiveness and quality of command transmission by over 60
- I developed functionalities to control valves, manage levels, and activate motors through the web interface.

Narwal Sistemas – Software Engineer (Fullstack)

<https://narwalsistemas.com.br/>

Fev 2021 - Mar 2021

- Maintained the development service that handled millions of daily transactions. (Javascript, Blazor, DotNet, aspNet).
- Developed services for currency conversions for ERP systems management.

Drift Web – Software Engineer (Fullstack)

<https://driftweb.com.br/>

May 2020 - Feb 2021

- At the renowned agency where I worked, I focused on website development for major clients, providing high-quality and impactful digital solutions.(Javascript, Reactjs, PHP, WordPress).
- We are currently engaged in a significant data migration project with UNIMED, a major hospital managing a large volume of patient data across Brazil.
